

The National Assessment of Educational Progress (NAEP) assesses mathematics in five content areas: number properties and operations; measurement; geometry; data analysis and probability; and algebra. The NAEP mathematics scale ranges from 0 to 500.

Overall Mathematics Results for Virginia

- In 2007, the average scale score for fourth-grade students in Virginia was 244. This was higher than their average score in 2005 (240) and was higher than their average score in 1992 (221).1
- Virginia's average score (244) in 2007 was higher than that of the nation's public schools (239).
- Of the 52 states and other jurisdictions that participated in the 2007 fourth-grade assessment, students' average scale score in Virginia was higher than those in 28 jurisdictions, not significantly different from those in 17 jurisdictions, and lower than those in 6 jurisdictions.2
- The percentage of students in Virginia who performed at or above the NAEP *Proficient* level was 42 percent in 2007. This percentage was not significantly different from that in 2005 (39 percent) and was greater than that in 1992 (19 percent).
- The percentage of students in Virginia who performed at or above the NAEP Basic level was 87 percent in 2007. This percentage was greater than that in 2005 (83 percent) and was greater than that in 1992 (59 percent).

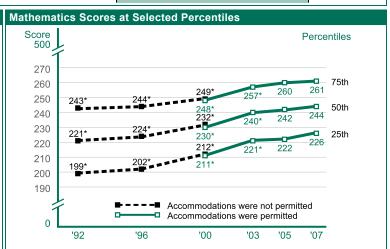

NOTE: The NAEP grade 4 mathematics achievement levels correspond to the following scale points: Below Basic, 213 or lower; Basic, 214-248; Proficient, 249-281; Advanced, 282 or above.

Performance of NAEP Reporting Groups in Virginia: 2007						
	Percent	Average	Percent	Percent of students at or above		Percent
Reporting groups	of students	score	below Basic	Basic	Proficient	Advanced
Male	51	245 ↑	11 ↓	89 ↑	44	8
Female	49	242 ↑	14 ↓	86 ↑	39	5
White	58	251	7 ↓	93 ↑	53	9
Black	26	228	27 ↓	73 ↑	18	1
Hispanic	8	235	18	82	28	1
Asian/Pacific Islander	5	256	4	96	60	15
American Indian/Alaska Native	#	#	‡	‡	‡	‡
Eligible for National School Lunch Program	30	230 ↑	24 ↓	76 ↑	20	1
Not eligible for National School Lunch Program	70	250	8	92	52	9

Average Score Gaps Between Selected Groups

- In 2007, male students in Virginia had an average score that was higher than that of female students by 3 points. In 1992, there was no significant difference between the average score of male and female students.
- In 2007, Black students had an average score that was lower than that of White students by 23 points. This performance gap was narrower than that of 1992 (29 points).
- In 2007, Hispanic students had an average score that was lower than that of White students by 15 points. Data are not reported for Hispanic students in 1992, because reporting standards were not met.
- In 2007, students who were eligible for free/reduced-price school lunch, a proxy for poverty, had an average score that was lower than that of students who were not eligible for free/reduced-price school lunch by 20 points. In 1996, the average score for students who were eligible for free/reduced-price school lunch was lower than the score of those not eligible by 24 points.
- In 2007, the score gap between students at the 75th percentile and students at the 25th percentile was 35 points. This performance gap was narrower than that of 1992 (43 points).

NOTE: Scores at selected percentiles on the NAEP mathematics scale indicate how well students at lower, middle, and higher levels performed.

- # Rounds to zero.
- ‡ Reporting standards not met. * Significantly different from 2007.
 - ↑ Significantly higher than 2005. ↓ Significantly lower than 2005.
- 1 Comparisons (higher/lower/narrower/wider/not different) are based on statistical tests. The .05 level was used for testing statistical significance. Statistical comparisons are calculated on the basis of unrounded scale scores or percentages. Comparisons across jurisdictions and comparisons with the nation or within a jurisdiction across years may be affected by differences in exclusion rates for students with disabilities (SD) and English language learners (ELL). The exclusion rates for SD and ELL in Virginia were 4 percent and 1 percent in 2007, respectively. For more information on NAEP significance testing see http://nces.ed.gov/nationsreportcard/mathematics/interpret-results.asp#statistical. ² "Jurisdictions" refers to states and the District of Columbia and the Department of Defense Education Activity schools.
- NOTE: Detail may not sum to totals because of rounding and because the "Information not available" category for the National School Lunch Program, which provides free and reduced-price lunches, and the "Unclassified" category for race/ethnicity are not displayed. Visit http://nces.ed.gov/nationsreportcard/states/ for additional results and detailed information.
